### *Contour Roller Facial....*

**N**ouveau Beauty Group and training academy invited me for their latest anti-ageing facial treatment. The salon in Yorkshire is owned by the renowned beauty professional Karen Betts. The treatment was carried out in a clinical but relaxing environment and was fully explained to me by my therapist.

The aim of the treatment is to stimulate the production and re-growth of the skin by using a hand held pin encapsulated roller which glides over each area of the face and neck (or body).

The treatment lasted around an hour and at the end my after care products and instructions were given to me. I looked very pink but I was told that is a normal reaction which gradually faded as the day progressed.

The next morning I was glowing. I felt like I had my teenage skin back! I had hardly any redness or marks but a plumper more youthful appearance. I absolutely love the results from just one treatment so imagine the effects of a full course.

This treatment definitely deserves a try...
